

Solidkit®

KOMO

Solidkit® design furniture that combines new and traditional materials to create stunning, tactile pieces.

All our systems have a strong emphasis on craftsmanship creating a bespoke feel.

KOMO is highly configurable and can be specified in endless combinations. Unlike cast concrete, KOMO modules are lightweight concrete forms that are easily installed and remain adaptable.

KOMO is the ultimate system for urban expression, it has a raw essence that will make a powerful statement in any environment.

KOMO modules are available in a selection of real concrete colours, with elements in toughened glass and a variety of wood finishes, including solid and veneered hardwood.

Configurations shown in Urban Concrete with oak veneer and matching lipping.
